Pico, California

DIRECTIONS

HOW TO PLANT

Azaleas are to be planted 18 to 24 inches apart. The head size should be 6" to 8" in diameter. This size is approximately a 5" pot, for larger sizes, use your own judgement or consult the salesman. The hole should be 10" to 14" in diameter. Peat Moss is to be about 2" or more deeper than the rootball. The Peat Moss should be thoroughly moist-erized before planting. To the Peat Moss, add 25% sand, soil or leaf mold. (A combination may be used if desired or is required.)

After planting, keep plants moistened with water every day for two weeks or more, depending on the weather and soil conditions. Ask salesman on other conditions or further information. We recommend that you use ONLY CANADIAN SUN-SHINE or GERMAN PEAT MOSS. ACCEPT NO SUBSTITUTES.

SPRAYING

We recommend Calthane or Arimate for use as an insecticide. Spraying should be done in the following manner:

Under the leaves, for -Red Spider and Thrip - 60 to 90 days apart. For Aphids & Mite - Spray from top to bottom at the same time but before spraying, the root system should be thoroughly -DEEP WATERED.

Apply spray only when leaves are dry, DO NOT SPRAY in the hot sun, the evening is the very best time however plants may be sprayed in the early hour of the morning if the temperature is below 75° F. and the leaves are dry.

FERTILIZING

We suggest using Blood Meal, Cotton Seed Meal or Grow-Master Improved. One teaspoon full on a plant in a 5" pot with a 6" spread, and proportionally according to size. DO NOT FEED FRESH PLANTS, wait about 4 to 6 weeks. Feedings thereafter should be from 60 to 90 days. If you plant a Full Green, DO NOT APPLY FOOD UNTIL NEEDED.

Should the plant show signs of yellow, consult your nurseryman. (Bring a branch sample.)

NOTE: SUCKER GROWTH ON THESE GRAFTED AZALEAS ARE FOUND NEAR ONE OR TWO FINGERS FROM THE GROUND. THESE SHOULD BE PULLED OFF.

THE IMPORTANCE OF GRAFTING IS FOR A MUCH BETTER ROOT SYSTEM, FASTER GROWTH, MORE BUDS AND STRONGER FLOWERS.

THE BEST WAY TO BUY PLANTS

The best plants to buy for the Home Gardens. Preferably the Grafted Belgian Indica Azaleas which are for the Southern States, etc. These are evergreen.

Buy your plants from an established, reputable nurseryman, preferably those who specialize in Azaleas. Don't take chances buying from peddlers, or temporary highway stands, department stores or similar places. Usually their selection of species and varieties is poor; and frequently plants are in bad condition from lack of care or mishandling. Also prices are really high in view of the quality received.

This was taken from the Horticulture Book on Azaleas.
